

Relationship between the economic and social environment

We believe that all economic activity should be positively related to its environment, not only minimizing the negative effects that may generate but creating stable bonds that allow mutual benefit.

In the **social area**, we have established an agreement with the Adepsis association to the application of the General Law on Disability, hiring and integrating people with functional diversity into our complexes.

We also work with different training centers for the reception of trainees favoring their professional development and completing their knowledge with our own reality. In addition, we collaborate with social nonprofit organizations.

We have an internal procedure to the **Prevention of children exploitation** that includes detecting methods of possible risk situations for minors, behavior protocol and acting protocol case of this situations. We ask our guests to inform us immediately if they detect any situation in which a minor may be attacked or at risk.

We encourage the promotion of **entertainment and leisure** activities outside our establishments, providing a positive impact on the economic development of the municipalities in the area, always ensuring that they are respectful with the environment and that it doesn't have a negative impact on it: local markets, shopping areas, guided tours, outdoor sports and local restaurants with Canarian gastronomy.

We are especially committed to care about the local flora and fauna, and we ask our customers to avoid any practice that could harm them and inform us if needed.

Our website gives access to the main pages of public organizations that offer updated information to the visitor: City Hall and the local Tourism Office.
